

OUR GOAL IS TO MAKE OUR CITY A PLACE WHERE EVERYONE HAS ACCESS TO TECHNOLOGY AND UNWANTED ELECTRONICS ARE DISPOSED OF ETHICALLY AND SAFELY.

THE STORY

Everyone has a junk drawer full of old devices, wires, and accessories that are taking up space.

Free Geek Toronto takes all those unwanted electronics and gives them a second life.

Electronic waste is a huge problem that is growing. According to the United Nations:

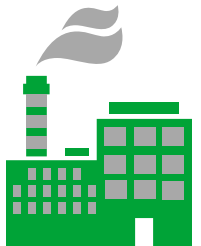

60% OF E-WASTE IS BEING SENT TO A LANDFILL

rather than being properly recycled, leading to devastating environmental destruction.

ON THE OTHER END OF THE SPECTRUM...

...people without proper access to technology or training on how to use it are being slowly displaced from both the workforce and modern social life.

WHAT WE DO

Free Geek Toronto first attempts to refurbish and reuse unwanted electronics before disassembling them for recycling.

By using Open Source Software, we are able refurbish older computers to create easy-to-use starter machines that:

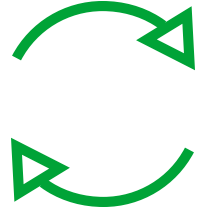

GET PEOPLE BACK ONLINE

Free Geek Toronto also gives people who face barriers to employment an opportunity to work and gain valuable experience in a tech workplace.

E-WASTE SOLUTIONS

Help us divert electronics from landfills. Let us manage your electronic waste.

As a registered OES service provider, we make sure your unwanted electronics get managed to the highest environmental standards while keeping data secure at all times.

We offer affordable, secure, and ethical e-waste solutions for businesses, community organizations, or anyone who wants their unwanted electronics put to good use.
